The power of collaboration
Beckman Institute for Advanced Science & Technology: By the numbers

3 research themes
- Integrative Imaging
- Intelligent Systems
- Molecular Science and Engineering

3 core research facilities
- Biomedical Imaging Center
- Microscopy Suite
- Visualization Laboratory

371 publications
authored by full- and part-time faculty during calendar year 2018

196% funding increase
for Beckman research: from $23.7 million in FY18 to $46.4 million in FY19

21 patents issued
to Beckman funded projects in calendar year 2018

26.8% of all U of I patents
were issued through Beckman supported research over the last 10 years.

Faculty members and students come from 14 colleges and 48 departments

- 218 faculty members
- 133 staff members
- 400 graduate students
- 65 postdocs
- 269 undergraduates
- 48 visiting scholars

ILLINOIS
Beckman Institute for Advanced Science & Technology
As you can likely tell from these key statistics, the Beckman Institute is a special place on the Illinois campus. It provides space, specialized tools, and programs that allow researchers from all over campus to connect and collaborate.

Beckman recently celebrated its 30th anniversary. It was the first interdisciplinary research institute on the Illinois campus, and it is one of the oldest in the United States. And Beckman continues to be dynamic, as it constantly updates its facilities and adds new people. The research happening here continues to explore new frontiers across disciplines.

We’re also working to make our collaborative culture a more diverse and inclusive place for all of our scholars. As a community, we’re building momentum, taking risks, and fueling incredible advances in science and technology.

Sincerely,

Jeff Moore
